MANAGEMENT  
SERVICES

**ATALIAN**  
GLOBAL SERVICES

Ensuring buildings, and their users remain safe and operational with a comprehensive range of facilities management services

## A global and integrated group working in Facility Management.

Created in 1944, the ATALIAN group is now a world leader in Facility Management. It is an independent company that is established in 32 countries across four continents. It helps companies and organisations outsource services by providing them with personalised solutions, adding value, and allowing them to focus on their core business. ATALIAN operates in the most diverse activity sectors and environments, offering a diverse and integrated range of services that meet the highest standards.

### 2 - Electrostatic Sprayer Disinfecting System

Powerful fast and efficient system with electrostatic sprayer.

### 3 - 30-Day Residual Antimicrobial

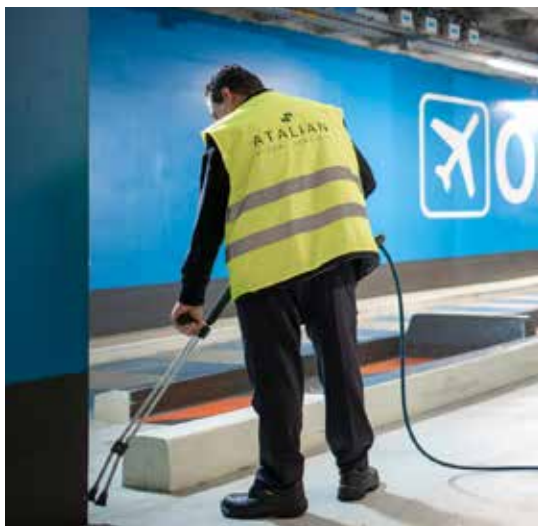

Stay germ free for up to 30 days.

# OUR PROGRAM FOR SAFER PREMISES

DETAIL CLEANING AND MECHANICAL DISINFECTION OF THE WORKING AREAS

Manual disinfection of areas and surfaces is the most effective method in combination with other prevention methods to prevent the spread of Covid19 virus.

- Disinfection will be carried out by our field personnel.
- All employees are responsible for evacuating their desks and work areas before the disinfection process begins. (Computer, paperwork etc.)
- The process involves wiping all surfaces (all horizontal surfaces, door handles, sanitary areas, handrails, elevators, eating and drinking areas, table, seat surfaces, etc.) with disposable cloth, sponges and disinfectant solution.
- The hygiene of all areas should be provided daily and regularly for protection purposes.

## NANOTECHNOLOGICAL SPRAY DISINFECTION

## OUR PROGRAM FOR SAFER VENTILATION

It is very important to clean the air conditioning systems that use the air circulating in closed environments, especially during the times of epidemic diseases.

- Filter cleaning is done with chemicals and disinfectants.
- Indoor and outdoor unit cleaning is done with chemicals and disinfectants.
- Electrical connections are checked and cleaned.
- All mechanical parts are checked.
- Gas leaks are checked.
- Legionella (antibacterial) tablet is put.
- It should be done regularly on a monthly basis.

## RECOMMENDED FEVER SCREENING SOLUTIONS

The use of thermal fever screening, we can help in detection of possible Covid-19 cases, by conducting preliminary fever screening at the entrance and/or critical areas of your sites.

### HIGH PRODUCTIVITY

It detects human body temperature within 1 second.

### INCREASED SECURITY

It avoids physical contact with non-contact measurement.

# HOW WE DISINFECT YOUR WORKING AND LIVING AREAS

Escalators

Desks

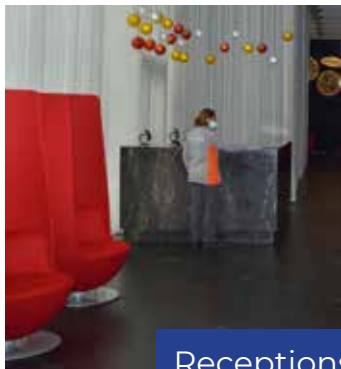

Doors

Toilets

Security Gates

Receptions

Elevators

# DISINFECTION DOORS

Viruses or bacteria have time to hold on to the human body or clothing. Disinfectant cabinets are manufactured to allow disinfectant molecules to stay on clothing and inanimate surfaces for up to 70 seconds.

# GERMICID LAMP DISINFECTION

We place a complete UVC germicidal emitter, killing viruses, bacteria and fungi in the space, which is switched on and off by a timer.

We then sterilize objects and entire rooms with UVC radiation with a wavelength of 254nm.

# NANO COATINGS

By applying on the walls and ceiling of the room with functional FN® coatings, you will create a highly effective protection on their surface against the deposition of pathogens (viruses and bacteria).
